WHY CHOOSE ASCENSION?

Designed and manufactured with pride in Tucson, Arizona, USA

Ascension lifts have been ensuring the safety and dignity of individuals with disabilities for over two decades. Design excellence, precision manufacturing, and unmatched customer service are our hallmarks. All Ascension lifts are designed and made in the USA.

Revolutionary innovations make Ascension the premier design choice for building owners, facility managers, architects... anyone who wants uncompromising performance and aesthetics. There is no comparison: Ascension wheelchair lifts are the safest, quietest, most attractive, most durable, and easiest-to-use lifts you can own.

Portable Lift Benefits

Ascension portable lifts are the preeminent choice for facilities that need flexible and convenient ADA access, often in multiple locations. Use the lift when and where you need it, then store it away until your next event. Ascension manufactures world-class ADA compliant portable wheelchair lifts with no machine tower or access ramp.

Permanent Lift Benefits

Ascension permanent lifts provide accessibility when you need a superb permanent solution. In addition to Ascension's legendary looks, performance, and reliability, installation is straightforward. The lift installs directly on the existing floor with no "pit" for installation, and yet it needs no access ramp, thus preserving your precious floor space.

Lifts vs. Ramps

The Americans with Disabilities Act (ADA) requires one foot of ramp for every inch of vertical travel. For example, a stage that is 24 inches high requires a 24-foot ramp. Ascension lifts take up far less floor space than ramps, enabling you to maximize every valuable square foot of your facility.

Virtuosio portable platform lift

Customer Support

Every new Ascension lift comes with a 20-year drive train warranty. Backed by responsive customer support teams, portable and permanent models alike are virtually maintenance-free (codes for permanent lifts typically require annual inspections).

Project Support

Whether considering how to use a portable unit across multiple locations or how to incorporate a permanent lift into a comprehensive building renovation program, we gladly review your specific project requirements. We offer complete architectural, engineering, and project management support to help you keep your project on track.

Patents Include:

- 7,926,618
- 7,721,850

- 6,182,798

See www.ascension-lift.com/patents for a complete list.

HOW IS THE ASCENSION EXPERIENCE DIFFERENT?

Ascension lifts are the premium choice when you want more than the status quo. World-class venues and small organizations alike rely on Ascension's renowned performance, appearance, and customer service.

Open Lines of Sight

Ascension lifts have low profiles and/or generous clear window area to maintain lines of sight. Our unique dual-cylinder hydraulic drive systems are fully contained within both sides of the Protégé and Virtuoso, and in the landing face cabinet of the Clarity. Patrons in the area can see what's on stage or across the lobby, and lift users have a view of their surroundings.

Permanent Protégé with Upper Landing Gate

Floor-Level Entry

Lift users enter Ascension lifts directly from floor level with no ramp, thanks to the ultra-slim platform floor that rests directly on the existing slab. Permanent models need little or no demolition for installation.

High Reliability

All Ascension lift models come with a standard 20-year drive train and 5-year parts warranty, setting an unparalleled industry benchmark. Superior customer service rounds out the Ascension experience, ensuring decades of satisfaction from your Ascension lift.

Child-friendly

Quiet Environments

Ascension lifts are designed to be used while events are in progress. Quiet hydraulic drive systems translate to seamless stage performances, subdued lobby environments, and scholarly educational settings. Passengers use the lift without attracting undue attention.

Uncompromising Safety

Safety concerns? Rest assured! Every Ascension lift comes with a variety of standard safety features. From the Protégé's multiple safety sensors, to the Virtuoso's rigid full safety skirting, to the Clarity's full enclosure, you can rely on Ascension to maintain the highest level of safety in your facility.

Independent Use

Every Ascension lift meets ADA requirements for independent use by individuals with disabilities.

The Clear Choice

If you want clean visuals, ease of use, high reliability, low noise levels, and strong customer service, Ascension is the clear choice for accessibility.
